I have a lot of details, we never actually sat down and did an after action report or anything...I kind of morphed right into preparing for HPAI and then the director job. I'll be able to get you the details though.

Brian, I am giving a presentation on the Miller Chemical response at a regional OSC meeting in early June. What happened to all the runoff water that was collected at the site? Do you have a final report or anything that discusses how things were resolved at the site? Please don't create anything just for this, but if you have a summary of the resolution can you send it to me?

Thanks,

Greg
